WORLD WATER WARS
MET COMMENTAAR VAN NALGOLM NEDOWELL

THE WAR OVER YOUR WATER IS ABOUT TO BEGIN

AL

'Luist dezelfde roesklak als An Inconvenient Truth, maar nu over onze afnemende watervoorraad.' - [kroonnie](#)

Investigation into what experts label the most important political and environmental issue of the 21st Century - The World Water Crisis.

We can't live without water. You may have thought it was a human right. In some places it is now illegal to catch rainwater, because rain is being considered private property, including the United States.

The Arctic and Antarctic remain the greatest wildernesses on Earth. With both Poles under grave threat from climate change, this may be the last chance to witness these great wildernesses before they change forever.

Six Degrees is an extraordinary journey into our planet's future, to explore the potential impacts of global warming degree-by-degree through six degrees Celsius over the next 100 years.

The Age of Stupid stars Pete Postlewaite as a man living alone in the devastated world of 2055, looking at old footage of seven real people from now and asking: why didn't we stop climate change when we had the chance?

The Truth About Climate Change is a two part documentary presented by David Attenborough who asks the question What is the future for our world?

Candid documentary that offers an alternative, and controversial, perspective on the global warming debate

Presented in a straightforward format by former US Vice President Al Gore. It sets out its compelling argument about climate change both methodically and entertainingly.

Juan Accidentes Dominguez is on his biggest case ever. On behalf of twelve Nicaraguan banana workers he is tackling Dole Food in a groundbreaking legal battle for their use of a banned pesticide that was known by the company to cause sterility.

The story of lawsuit by tens of thousands of Ecuadorans against Chevron over contamination of the Ecuadorean Amazon. One of the largest and most controversial legal cases on the planet

We love our mobile phones! But the production of phones has a dark, bloody side. The minerals used to produce phones is coming from mines in Eastern DR Congo, which is funding a civil war which has cost the lives of 5 million people

Ethiopian coffee growers struggle against bankruptcy, earning only a fraction of their beans' worth. BLACK GOLD follows one man's fight for a fair price, exposing the truths behind the buying, selling and consumption of coffee

The film is a user-generated feature-length documentary, shot on a single day--July 24, 2010--that enlisted the global community to capture a moment of their lives on camera. A unique experience that shows, what it's like to be alive on earth today.

"Garbage Dreams" follows three teenage boys growing up in the world's largest garbage village, on the outskirts of Cairo. It is the home to 60,000 Zaballeen, Arabic for "garbage people." who survive by recycling 80 percent of the garbage they collect.

Just Do It follows climate activists as they blockade factories, attack coal power stations and glue themselves to the trading floors of international banks despite the threat of arrest.

Colin Beavan decides to completely eliminate his personal impact on the environment for the next year. It means eating vegetarian, buying only local food, and turning off the refrigerator.

Behind-the-scenes of the tar sands in Alberta, Canada. Seen through the eyes of scientists, big oil officials, politicians, doctors, environmentalists, and aboriginal citizens directly impacted by the largest industrial project on the planet today

Canada's tar sands. H2Oil is a feature-length documentary that asks: what is more important, water or oil? Will the quest for profit overshadow efforts to protect public health and the environment in Canada's richest province?

A look at China's massive industrial revolution, and the devastating impact on the environment.

The film follows a project by the Brazilian artist Vik Muniz, as he uses recyclable materials from the massive landfill site of Jardim Gramacho, Rio De Janeiro, to use in his work.

The Auto industry's biggest conspiracy revealed. Why did General Motors' destroy the EV-1 electric car in the 1990s?

Is the oil beginning to run out? Shot over 4 years in 13 countries this film uncovers the myths surrounding the future of world oil supplies.

This award-winning documentary exposes the problems associated with our energy consumption. It also offers concrete solutions for those who want to educate themselves and be part of the solutions in this decisive era.

A compelling, intelligent and urgent warning that the age of abundant oil is over. Featuring testimonies from the world's top experts, conclude that the Earth's oil supplies are peaking and a crisis of global proportions looms.

Bees pollinate the food we eat. A mystery known as 'Colony Collapse Disorder' is causing billions of bees to abandon their hives. Bees are disappearing all over the planet and no one knows why!

Food, Inc., is an exposure of America's food industry which is controlled by a handful of corporations that often put profit ahead of consumer health, the livelihood of the American farmer, the safety of workers and our own environment.

Documentary filmmaker Rupert Murray examines the devastating effect that overfishing has had on the world's fish populations

The documentary is based on authoritative and influential scientific sources, which demonstrate that livestock farming is one of the most important causes of global warming.
